Career Objective

Aspiring Software Engineer with strong interest in programming, Data Structures, and high-performance computing, seeking an opportunity to build efficient software solutions and grow through real-world engineering challenges.

Education

Velammal Institute of Technology - B.E, CSE
2027 | CGPA: 8.24

Technical Skills

- Languages: Java
- Core: DSA, OOP, DBMS, OS, CN
- Operating Systems: Linux
- Database & Tools: SQL, Git, GitHub, VS Code

Projects

Supermarket Sales Analysis

- Engineered a relational MySQL database to efficiently store, organize, and manage historical retail datasets.
- Constructed SQL queries using aggregations and filters to track monthly revenue trends and customer buying behavior.
- Synthesized data insights to identify high-performing product categories and simulate inventory optimization.
- Technologies: SQL (MySQL)
